Course code: CSE-0318

Course name: Software Engineering Lab

2 May, 2021

# TABLE OF CONTENTS

**1** **Project Overview**

**2** **Purpose**

**3** **Important Features**

**4** **Requirement**

**5** **Future Scope**

**6** **Conclusion**

- Integrated online system for Content, Blog post and forum management.
- Related works- PostNuke.VBulletin,PHPnuke
- Users- Personal Blog post website, small institution, small companies
- Technologies- PHP,MySQLi,Apache

# Purpose

Nowadays every reputed schools, colleges, universities, companies have their own websites. And on their website they have a small section called blogs. So, my aim is to develop a system where they can not only post their blogs, activity but also using search engine they can find their specific post, can edit, add admin, can see admin details.

# Important Features

- All-in-one solution for building web sites transform.
- This system is fully integrated with Content Management system
- Customizable
- Easy administration through web browser
- Different level of user access

# Requirement

## Language

- Front-end: HTML, CSS, Bootstrap and JavaScript
- Back-end: PHP, PDO, JavaScript
- Database: MySQLi

## Environment

- XAMMP
- Apache
- MySQLi server

## IDE

- PhpStorm/VSCode

In future this system can use many school, college and university. Teachers, admins and also students can post their experienced and vast knowledge using this system.

# Conclusion

The aim of this project is to develop a content management system for evaluating information quality on Blogs. In order to develop the content management system, appropriate information quality criteria for Blogs were first identified.
